Just at this point the row between Mr. At Grace-Street Baptist church during the week eleven persons were received by letter. There were several professions of Massey and Captain Wise took place, and in order to give a full and fair statement the recorded account of Mr. George J. Hooper, Jr., the notary public before whom the depositions were being taken, is given. conversion in this congregation during the The regular monthly meeting of this Mr. Hooper says:

The Edison Light.

A LETTER PROM PRESIDENT L. L. BASS TO THE RICHMOND AGENT.

Pertinent to the light-question, and to show what prospect the city has for obtaining the Edison light, the following correspondence is published:

RICHNOND, VA., February 2, 1883.

W. P. Hix, Esq., Agent Edison Electric Company, City: Company, City:

Dear Sir,-The city of Richmond owns definite and formal statement of about what your company would be willing to do in the matter of lighting our city by the latest improved Edison electric light. I beg to say I am not authorized to speak for the Council of the city (though the president of one branch of that body). I want the information, however, so that the subject of lighting the city by the Edison plan may not be overlooked now while we are may not be overlooked now while we are should be competent amateurs. The ladies of this church are noted for the good suppers they discussing the light question, and because I believe your statement of its cheapness obviates, if it can be carried out, probably every obstacle to its introduction and use here. Yours very respectfully and truly,

LUCIEN L. BASS.

RICHMOND, VA., February 17, 1882. Captain Lucien L. Bass, President City Council, Richmond, Va.:

that we are not prepared to give accurate estimates of the cost of lighting from a central station for the reason that we have not as yet had sufficient experience in this matter to enable us to arrive at the exact figures. We know simply this, that one station in New York city is entirely suc-cessful, both practically and commercially, although we cannot tell at present exactly what the cost of lighting will be. In round numbers it will approximate \$1 to \$1.25 per 1,000 feet of gas, or its equivalent, the prin-

would sell a plant to the city of Richmond without retaining an interest in the plant. That matter would have to be decided by our Board of Directors. They know that their system is a good one, and certain to pay the stockholders, and for this reason have to be at the works'all night. If so, he they want to retain an interest and hold stock in any company using their franchises.

Our general plan for formation of companies is to receive from the sub-company about 30 per cent, of their stock, of which 10 per cent, would be in cash and 20 per cent, stock itself. In consideration this the sub-company would have the privilege of purchasing dynamos, materials, c., at cost, and we would of course retain an interest in the business to the amount of stock held by us, which would be, as above stated, about 20 per cent.

York district is \$1 per 1,000 candles of light, which is equal to gas at about \$2 to \$2.25 per 1,000 feet.

Should you desire definite information as to cost of formation of company, you should first make application to the Edison Company, stating names of the proposed incorporators, which would be subject to the approval of our Board of Directors. In order to determine cost we would require a map of the district indicating the location of such buildings as were to be lighted, and the number of lights in each; also showing the proposed location of the

dynamo, power, &c.

Any further information you may desire
will be furnished by President S. B. Eaton,
or Secretary C. Goddard, No. 65 Fifth av-

center, New York city.
Yours respectfully,
W. Preston Hix, Agent,
The Edison Company for Isolated Light-

Dear Sir,—The city of Richmond owns its gas-works and manufactures the gas used in the city, and the City Council is now considering the question of changing the mode of manufacture. In conversation at the Gallego Mills a few days ago I understood you to say that your company was now prepared to light cities by the electric light at a less cost than it could be done by gas. I would like to bave some definite and formal statement of about what your company would be willing to

On reaching home and acquainting his wife with what he had done, she refused to have it administered to the child, as she was strongly in favor of Homosopathy. That night the child passed in suffering and the parents without sleep. Returning home the day following, the father found the baby still worse; and, while contemplating another sleepless night, the mother stepped from the room to attend to some domestic design and left the cather with the child. Durling
